**Model BGSE-FH-400-0022**

**Features:**

B GSE Commercial Fuel Hydrant Aircraft Service Pits provide a safe, efficient, and convenient connection for today's modern airport fuel hydrant systems. The Pits are available in several variations and with pre-installed internal components.

- Round Aluminum hatch cover providing superior service access and corrosion resistance
- Double hinge allows for vertical (120°) or flat (180°) hold when open
- Waterproof cover minimizing water intrusion and freezing
- Explosionproof electrical internals available

**Benefits:**

- Aluminum Billet Cover with color insert for quick recognition
- Supplied as a full pit assembly or without internal components
- Full support and extended warranty available for pit and components
- Custom made brackets and supports for any specified brand or model valve
- Manufactured to BS EN124 Class F900
- 90-ton Test Load allowing for use with all aircraft on all ramps
- Compliance with requirements of BS 7903
- Permanently engraved pit identification
- Available with side entry for use of shallower trenching
- Standard epoxy coated rugged steel vault
- Documentation and support for third party installation

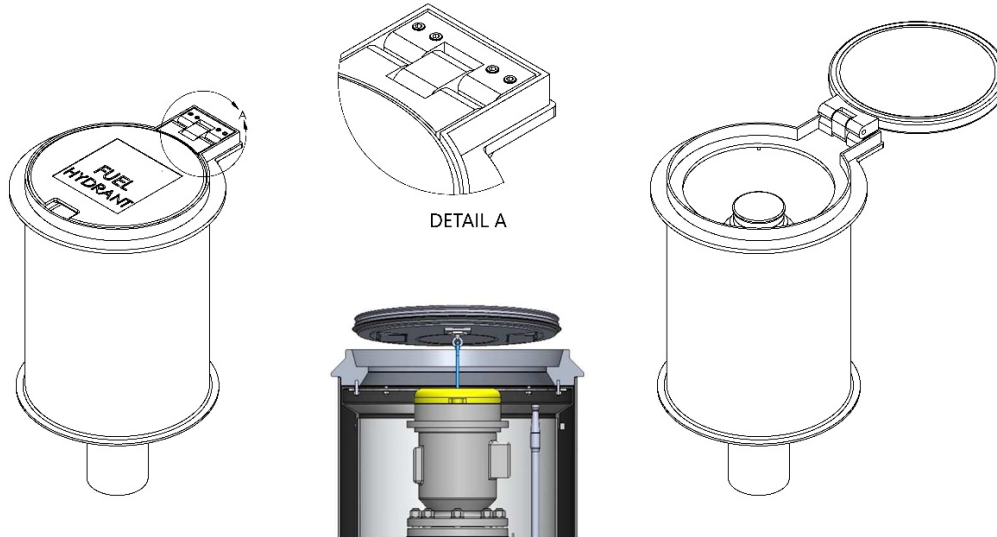

With internals

Empty
